DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A, drawn to Figs. 1-6, Claims 1-19; and

Species B, drawn to Figs. 7-10, Claim 20.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Stuart T. Auvinen on 7-5-2005 an election was made with traverse to prosecute the invention of Group I, claims 1-19. Affirmation of this election must be made by applicant in replying to this office action. Claim 20 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Specification

Claim Objections

3. Claim 4 is objected to because of the following informalities: On line 3, the letter "a" in the sentence "mechanical drill or a with a laser, or etching" seems to be indefinite and vague. Appropriate correction is required.

The disclosure is objected to because of the following informalities:

Section 4, line 7 of the specification, the word "that" seems to be incorrect. It may be corrected to read - - than - -.

Sections 16 and 81, lines 2 of the specification, the word "fro" seems to be incorrect. It may be corrected to read - - for - -.

Section 86, line 15 of the specification, the sentence "CI" aims that do not use the word" is indefinite and vague.

Appropriate corrections are required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Sekine et al. (US 6,495,914). Sekine et al. teach a metal surface-mount package (Fig. 6).

Allowable Subject Matter

6. Claims 1-3, 5-7, 9-19, are allowed.

7. Claim 4 would be allowable if rewritten or amended to overcome the claim objections set forth in this Office action.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
